

Appendix 6.1

Excluded Zone of Theoretical Visibility

- Development Boundary: 7.52ha
- Zone of Theoretical Visibility (ZTV)

Map illustrating the Zone of Theoretical Visibility of the proposed BESS development to a 2km radius. The Zone of Theoretical Visibility has been run to each development component and its corresponding height.

The ZTV is computer generated in Windfarm V5 using OS landform terrain 50 data and takes into account natural and built features within the landscape. All barriers are considered by the software to obscure the development entirely with no demonstration of filtered views of partial screening. The earth's curvature and atmospheric refraction are included. Viewer height above ground is 1.7m.

Scale: 1:15,000 @ A3
